Almond Orchard & R-1 Zoning
Arbuckle, CA

Property Information

Location:	From Highway Interstate 5 North take exit 566 for Arbuckle/Hilgate Road. Go Left on Hilgate Road for 0.1 miles. Go Left on Wildwood Road for 0.8 miles. The orchard is on the right (West) side of the road. It's shown by appointment only! DO NOT TRESPASS!
APN#:	Colusa County APN#: 021-300-053
Orchard:	<p>There are 27 acres planted to almonds. The orchard was planted in 2015. It's on a 18x24 Spacing. It consists of 50% Nons, 25% Sonora, 25% Woodcolony on Titan rootstock.</p> <p>The orchard has been producing approximately 2,400lbs/acre. Yield History is available upon request to qualified buyers.</p>
Soils:	The entire farm is comprised of primarily Class I Soils. Please review the attached soils map for more information.
Irrigation:	<p>The orchard irrigates in 1 set by either the well or district water with a VFD & Filter Station.</p> <p>The orchard irrigates via dual line drip irrigation</p>
Leases:	There is the potential to lease an additional 3 acres for 12% of crop along with the sale of this property.
Future Subdivision:	<p>There is a high end residential subdivision on large lots adjacent to this property. The subdivision has been a major success for Arbuckle. The homes are always in high demand and rarely stay on the market for more than 30 days. The subject property would make for an excellent addition.</p> <p>The subject property is within walking distance from both the middle & high schools and less than 2 minutes from Interstate 5. It's already zoned and ready to be mapped & developed.</p> <p>R-1 zoning allows for 1-5 units per acre which fits in nicely with the existing subdivision next door.</p>

Arbuckle, CA

Property Information

Taxes:	The property is NOT enrolled in the Williamson Act. The property taxes will be a little over 1% of the purchase price at the close of escrow.
Price:	\$963,550. The owner would consider selling the farm at a higher price and include a rental home & 1.33 acres.
Terms:	Cash at the close of escrow
Comments:	High yielding almond orchard & future subdivision! This orchard is in its prime and will be income producing through the entitlement process. Already zoned, just needs a map and will be ready to build! This orchard is producing great yields and has many economic years ahead of it. Dual source water with excellent soils. Please call Charter Realty for more info!

Description

Land capability classification shows, in a general way, the suitability of soils for most kinds of field crops. Crops that require special management are excluded. The soils are grouped according to their limitations for field crops, the risk of damage if they are used for crops, and the way they respond to management. The criteria used in grouping the soils do not include major and generally expensive landforming that would change slope, depth, or other characteristics of the soils, nor do they include possible but unlikely major reclamation projects. Capability classification is not a substitute for interpretations that show suitability and limitations of groups of soils for rangeland, for woodland, or for engineering purposes.

In the capability system, soils are generally grouped at three levels-capability class, subclass, and unit. Only class and subclass are included in this data set.

Capability classes, the broadest groups, are designated by the numbers 1 through 8. The numbers indicate progressively greater limitations and narrower choices for practical use. The classes are defined as follows:

Class 1 soils have few limitations that restrict their use.

Class 2 soils have moderate limitations that reduce the choice of plants or that require moderate conservation practices.

Class 3 soils have severe limitations that reduce the choice of plants or that require special conservation practices, or both.

Class 4 soils have very severe limitations that reduce the choice of plants or that require very careful management, or both.

Class 5 soils are subject to little or no erosion but have other limitations, impractical to remove, that restrict their use mainly to pasture, rangeland, forestland, or wildlife habitat.

Class 6 soils have severe limitations that make them generally unsuitable for cultivation and that restrict their use mainly to pasture, rangeland, forestland, or wildlife habitat.

Class 7 soils have very severe limitations that make them unsuitable for cultivation and that restrict their use mainly to grazing, forestland, or wildlife habitat.

Class 8 soils and miscellaneous areas have limitations that preclude commercial plant production and that restrict their use to recreational purposes, wildlife habitat, watershed, or esthetic purposes.
